DESCRIPTION

This project develops and implements StormWater Pollution Prevention Plans (SWPPP) for Department of Public Works and Transportation (DPWT) maintenance facilities to comply with aspects of the Federal Clean Water Act National Pollutant Discharge Elimination System (NPDES) notice of intent (NOI). This project provides for the design and construction of structural covered areas to ensure appropriate storage of hazardous materials.

JUSTIFICATION

To comply with permit requirements, each of the DPWT maintenance facilities must implement appropriate pollution prevention techniques to reduce contamination of stormwater runoff. Covered areas are required under the NPDES for all hazardous products and liquid drums that are stored outside, to avoid the potential of drum deterioration, leakage and/or runoff contamination. The structural improvements of covered areas are scheduled at the Brookville, Seven Locks, and Colesville Depots and the EMOC facility.
